### About the Speaker:

Dr. Adam is passionate about oral surgery and focuses most of his time on larger, full-arch surgical cases involving multiple implants and restoring the patients' full smile. Dr. Adam received his undergraduate degree in Biology from DePauw University in 2006. After graduating, he attended the Indiana University School of Dentistry, where he earned his Doctor of Dental Surgery (DDS) degree in May 2010. Dr. Frounfelzer is an accomplished dentist deeply devoted to the field of dental implant treatment and is a Full Arch Educator.

### Description:

A Practical Digital Workflow for Modern Implant Dentistry. Digital Dentistry isn't the future - it's the expectation. But for many dentists, the jump to fully digital implant workflow can feel overwhelming. This course is designed specifically for younger dentists who want to go fully digital without overcomplicating things or making expensive mistakes along the way. We'll break down a simple, repeatable digital workflow that works for single-unit implants and scales all the way to full-arch cases, using the same core principles and systems throughout. No theory-heavy lectures. No perfection required. Just real-world dentistry you can apply immediately. This course is taught from the perspective of a private-practice implant dentist who made the transition from analog to fully digital - and understands exactly what it feels like to be early in that journey.

### Lecture Objectives:

Capture reliable digital scans for implant cases | Plan implants confidently using a guided, predictable approach | Understand how one digital workflow can support singles and full-arch | Avoid common digital mistakes that slow dentists down early | Build confidence and momentum as you grown your implant skill set

Make checks out to **IKDDS** and mail to PO Box 97, Arcola, IN 46704 or Scan QR Code to pay via credit card
